FORTLAND, MONDAY, FEBRUARY I, 1887.

TAXATION OF WATER BONDS.

A demand has been put forth by some of the members of the legislature that the additional lesue of water bonds proposed for Portland shall be taxed by the state. Whether an addi-tional issue of bunde, in the present circumstances, should be authorized, or not, may be questioned and is questioned; but as to this proposition of taxing such issue there should be question. Such proposition is based on ception and error, which ought to be

To fax the means which a community our ploys for supplying itself with water simply means an increase of the cost of supply. The tax does not come out of the purses who take the bonds, but out of the community. Untaxed diverger cent, water bonds of the city of Portland sold recently at a large premium. Of this recently and this low rate of interest the public premium and this low rate of laterest the public get the whole benefit. But if there he an additional bases of bonds and the same are subjected to farming, the rate of interest will be higher and the boads, instead of goleg at a premium will go at a discount. The investor

aiwaysonsiders these things.

The main ground of this demand that the bonds be taxed is said however to be this namely, that exemption of the bonds from seasition wil cause a loss to the state of the tax One large amount of money now subjected to the about the last imaginary loss. No one can suppose that the money that goes into these bodds has actually been paying a trax to the state. Perhaps it has been invested in U. S. hitherto; in any event it would be entirely safe to say that the assessor has never succeeded in indigg it.

The state doesn't tax a town upon its public parks, engine houses, fire apparatus, or other mondigal property; why should it tax a town upon the means it employs to supply the water speciesary to make those parks it pleases of resort and to render its engines and fire apparatus effective? Every city and every considerable town-thust obtain water for its people, and the best way is through public effort, by the use of mu-nicipal credit. Is it proper, then, for the state lockep in here, and, by imposition of a burden, minimal/ze or diminish that credit, and thereby because the cost of so necessary a thing to all-the people of the city or town, including three peoply able to bear it? Such tax, let it always he borne in mind, never comes out of the bondholder, and no contrivance ever can take it out of the bondholder. It is always a burden upon the water consoner, and the people of any or-ganized town or city are entitled to the benefits which their credit as a community gives them for supplying themselves with an article as nec-cessary as ar, unburdened by the state.

THE DECISION AGAINST WOMAN SUF-FRAGE. Though one may not have been an ordest par-tion of woman suffrage, yet when he takes note of the sort of people who are shouting loudest with joyoter the decision of the supreme-rant of Weshington Institute. out of Washington territory against woman mirage, he will pretty surely be moved to regeneral the decision was made. If the intelligent, enlighted and decent people of the termitory were not unanimously for woman soffingers its quite plann that the other sort were very generally against it. By many in the termitory it is charged that there was a "conspiracy" to get the decision on a case transped up for the purpose. The Tacoma Ledger, giving the giving the decision says. "The court released of the decision says." of the decision, says: "The court released a criminal on a technicality so that he can vote at whom all will admit have some laffaence for good on the morals of the community. How many more of the violous element will this fail delivery decision is onch upon the people of the ignition; ?" The same paper also saye: "The opinion of Judges Turner and Langford on wibing out woman soffrage in Washington ferritory contains fifteen thousand words. Does any sensible man or woman in the tarritory be-liers that it was prepared between Monday after-noon, when the case was argued, and Thursday morning, when it was given to the public? This fact makes it look like a consultacy more than ever." The Tacoma News mays "the plan seems to have been premeditated, and the opinion prepared in anticipation of the case." The Kree remarks further: "The action has more the appearance of the carrying out of a purpose than the legiturate results of a judicial concis-sion fairly reached from the consideration of a case presented. There seems to have been an Mort to seek or rather create an opportunity to Mort to eeth or rainer cavato an opposit a pre-exercise judicial authority in carrying out a premeditated design. Such action tends to unsettle public confidence in the courts and the judiclary and destroy threstability of the law. However much people may differ in their opinions as to the policy of measures there is a general repug-sance to having any established method or ex-pressed will of the people rutely set sales on a mere technical point brought up and snatained -interpreting the law to suit the end sought. rather than accepting the will of the people as

STATISTICS OF CROPS.

Much valuable information is presented in the report of the crops of the rear 1886, just usual by the statistician of the department of agricul-ture at Washington. The corn crop of the year aggregated, in round numbers, 1,955,050,050 bushels, grown on 75 (fell 06s) acres. The yield was about 22 bushe's an acre, and the farm value of the whole crop was \$610,000,000. The average price December 1, 1836, was 36.6 cents per turbel. The great corn states were those, riz: Illinois, Iowa, Missouri, Kanses, Indiana and Nebra-ka-taking precedence in the orde

of wheat the aggregate product was 457,000. O bushels from an orea of \$7,000,000 acres, having a farm value of \$601,400,050. The average value, December 1, was in 7 conts per husbel, against 77.1 for the previous crop and 61.5 for the crop of 1841. The general average of yield was a little above 12 bushels per acre. Oregon's wheat crop is put at \$51,610 acres, \$1400ng 11,133,000 hushels, valued at \$7,570,110, and the crop of Weshington territory is out down at \$45,190 nores, yielding 7,550,000 hashcle valued at \$5,065,200. This statement would make the average yield in Washington territory about 4½ bushels per acre larger than in Oragou. The product of cuts in the United States is put at 624,000,000 bushels, valued at \$1.05,000.000 bushels, valued at \$1.05,000.0000 bushels, valued at \$1.05,000.000 bushels, valued at \$1.05,000.0000 bushels, valued at \$1.0

00,600, In this report there is a great deal of information about mecellaneous products. Thus, in Maine, there are filty-seven corn-packing factories, whose total product for the year 1886 was 10,701,600 cases. Amounts received by farmers for corn sold for canning in some instances were as high as \$845 per acre, and the average was \$45. Here is a great industry that might be developed in Oregon. The tomate pack o the country for the year was 2,363,760 cases of two dozen cane each. New Jersey leads in this industry, and Maryland, Virginia and Pennsyl-tania follow next. California is credited with 141,000 cases. This industry ought also to b

developed largely in Oregon.

The comparative etatements of prices of leading products on the lat of December, 1855, are interesting and valuable. Wheat in Mains was worth \$1 20 per bushel, in Massachusetta \$1, in New York 84 cents, in Illinois 69 cents, ic New York 31 cents, in Illnots 69 cents, in Min-nesota 61 cents, in Kansas 55 cents, in Iowa 50 cents, in Dakota 52 cents, in Oregon 68 cents, in California 53 cents, and in Washington territory 67 cents. The statement shows that we get here as good prices for wheat as are obtained in the leading wheat growing sections of the Illnots, and batter, indeed than are obtained in Union, and better, indeed, than are obtained in Minnesota, Iowa Kansas and Dakota, Califor nis has an advantage over us in consequence of the incomparable shipping facilities furnished at San Francisco.

Though Gov. Paunoper's views on state rights are; to a large extent harron idealities, his views of the wildly land question are into any any

means. They are practical, they are straightforward, they follow the subject right up, they tread on its beels and not lightly either.

RESPECT FOR HUMAN LIFE.

The terrible accident on the Vermont Central radicoad, with its estimated awful loss of sixty lives, is the worst railway disaster since the memorable Ashtabula horror, and is identical in all its agonizing details of death by fire, which quickly swept the wreck and roasted to death the unfortunate persons who were locked within the timbers of the numer cars beyond all positive. sibility of escape. For the accident the railway is not responsible, as no human foresight can provide against the possible action of frost in causing broken mile at this season of the year, but the tarmble consequences of the disaster might have been reduced one-half at Ashtabula and at Woodstock, it railway managers were compelled by law to heat their cars by pipes from the engine, and light them by electricity. We do not forget that President Depew, of the New York Central and Haden, in a recent public speech, neclared that the great railroads of the country had sought in van for a method to beat and light cars that would secure the passengers from death by fire in case of accident; but Mr. Depew is nither very figurant or deliberately disingenuous, for the railways of Bavaria are compelled by law to heat their cars by pipes from the engine, and to light them by electrimight have been reduced one-half at Ashtabula from the engine, and to light them by electricity. There is a milroud in Massachusetts that for saveral years has heated its trains entirely by pipes from the locomotive, to the complete satisfaction of its public, and no one will dispute that care can be safely lighted by electricity. Of course in case of any necessary detachment of the locomotive, the heat would be not affect. of the locomotive the heat would be out off femporarily, but this would be a trivial hardship that the public would patiently endure for the sake of protection from sure death by fire in

case of serious arcident.

The awful spectacle at Ashtabula; at Spnyten Devil; at the scene of the recent accident on the Milwankee and St. Paul, and at Woodstock; not to recall a hundred minor disasters, where the wrecked cars became the funeral pyro of the living and the dead, ought never to be re-peated in America, if law can be successfully invoked to compel all railroads to exhaust the mechanical ability of the world, regardless of expense, to make such holocausta impossible. All reflicads, so far as we have observed, carry nxes, saws and other tools ample to rescue all living passengers speedily, who are pinned within the wreck; but all these implements are useless when a waii of fire is between the ruins slowly burned to death, locked in each other's arms, and before the horror-stricken eyes of the father of the bridegroom. The sights and counts at the fillwaukse and St. Fanl horror were so agonizing that Bishop Whipple, of Minwere so agonizing took issues whippie, of annesots, is now working for the passage of a law compelling, mallways to equip their cars with best axivilight-giving-apparatus that will make death by fire impossible in case of nocident. Beath on the rail by fire, in the way it occurs

almost invariable in case of serious accident in America, has never, according to our memory, taken place in England. In no civilized coun-try in the world does the law give itself so little opening for the protection of human life as in America, whether in the construction of public buildings, or the regulation of public vater, and steam transportation. Take the simple matter of the full of scaffolds by which every year hondreds of men are killed. Such accidents never could take place if the law made every apparintendent or contractor for such work see to it personally that the scalfolds were made absclutely secure before a workman was permitted to occupy them. No man should be permitted, under severe penalty, to leave his horse untied in the streets of a city. It is not enough to make him liable for such destruction as may be consequent upon his aarelessness,—he should be severely fined for failure to secure his boras reasonably against any chance to take fright, do mischief and possibly destroy life. Men who leave loaded firearms within the possible reach of children, who point gues at their neighbors with fatal result, ought never to be acquifted on the plea that "I didn't think it was loaded." The man who, in diobedience of the warning of the health offi er, persists in breeding infectious or contagious dis-esses, or recklessly mingles with his fellows; showing that he carries disease and death to his clothes, ought to be stornly punished; and the man, ignorant of medicine, askious or surgery, who destroys or disables a human being under false pretanness to the scientific knowledge of the schools, ough: not to go unwhipt of justice. In: the case of pieuro-pneumonia among cattle there is no neglect of precautions against it; no hesifation in their enforcement, but when you come;
down to the projection of human life it is pracstically of living phasequence to the administration;
of poblic for his when a herd of cattle. To
the corpular impulse, "Is not man better than;
a sheep," their reage administration of the law,
hasterer his letter, somewers by its action in:
the negative living prefuency with which juries
acquire living clearly guity of morner and other
great crimes, or let them off with a light verdict; the readiness with which executives grantle the case of pieuro-pneamonia among cattle theredict; the readines with which executives grantly pardons to breat villates are other notorious substrations of the dreary want of a proper respect for the sanctity and the safety of human

men follow crims with mad nursuit we not only do not kill them, but we do not always it them up, and when we do its Stoneman type of gore-ernor snaps the cord with the stroke of a par-don, pats the dog on the based, "tails alm a poor fellow who has suffered enough," and affecto entry bide him go forth and bits no more. The philosophy of protection for human life that we practice seriously is like that uttered by Lincoln in jest when, alluding to the capture! of a brigadier-general and an army train, he said he "was sorry about the horses and mules, for they cost the government dear, but as for tien. Stoughton, he could make a brigadiar a: my moment with a strake of his pan," suron about human life. Men are chean, but

takes money to buy cattle; so the law con-terning picture-pneumonia enforces likely, while laws enacted for the protection of human life are, by comparison, either ignored or fashis and notically enforced. In England a peasant's but or the castle of a duke, in which it was known there was a case of typhoid fever, would be instantly taken pos-

session of by the medical authorities and remain

research of the neutral that disease and remain-under their care until the disease was traced to its origin, the cause removed, and the patient would be carefully guardet, so that he could not possibly, through the ignorance or neglect, of his attendants, multiply the cases of dread' The woman suffrage act in Washington terrifory was pronounced invalid chiefly on the ground that the purpose of the act was not adequately set forth in the title. A considerable cumber of other acts on the statute book of the ferritory are said to have the same defect and therefore may be regarded also as invalid.

CHEERVATIONS ON PREUMORIA.

PORTLAND, Feb. 6. To the Editor of the Oregonian: By inspection one can see the value of the en-cosed article from the "Monthly Weather Review" for November, 1886, propared under the direction of the late Brigadier and Brevet Major-speneral W. B. Hazzen, chief signal officer of the army. It was Gen. Hazen's last report, we sup-

The question of climate comes to us often in lettern, especially in respect to pulmonary diseases. We can give general answers that the Pacific Northwest is healthy. But clear and accurate facts drawn from serial laws and changes are needed. The unmouth has of late been a frequent section of the most of the cause is found, its province of the control of the control of the control of the control of the first province of the most province of the first province of the most province of the first province of the control of the con

lished in Lansing:

CAUSE OF PNRUMONIA.

Secretary Baker of the state board of health has devoted most of the lessure time at his disposal for mostles to a determined effort to trace out the ease of the tension of the properties of steknises in the state, and upon over 27,000 weekly reports of steknises in the state, and upon over 20,000 meteorological observations, and the conclusions arrived at point so uniformly in the 1 are direction that Dr. Raige is produced that complete species has crowned his officers.

emiddent that company of the company

think, that the stekress from pneumonia is absolutely controlled by the temperature of the atmosphere. The higher the temperature is the same speech. The higher the temperature is the same shown preumonia, and the lower the temperature the lass sickness. The fact which I think I have completely demonstrated is that in any given lace, wherever studied, pneumonia is quantificely preportionate to the coldness and dryness of the atmosphere, and it follows that if there is any pneumonia, which is infectious, it is absolutely dependent upon these meteorological conditions for its section upon the temperature of a conditions for its section upon the temperature of about is degree, and this contains about 18 the grains of vapor he sech when or of water at a temperature of about is degree, and this contains about 18 the grains of vapor he sech when he series were at a temperature of about is degree, and this contains about 18 the grains of vapor he sech who have the contains about 18 the quantity of vapor exhibited hat when the arrivery old and dry the quantity of his work is a standard to the proper that the proper that the blood into the air election of the blood into the air election is the proper than the chloride of sodium, and then the thio the of sodium, and then the thio the of sodium, and then the thio the order when the vanor passes wit with the expired air. plry. suggests that the arrest of this threatened de-

from exposure to summent and carrent atmosphers.

We may infer, finally, the great value of exact daily tabular statistics, not only of sickness and disease, but of atmospheric conditions in every state, county, city and town of the country, carried through years and decades.

If it shall be found that open cattle cars and foul stock yards produce the death of animals before their time the prevention is easy to be found, their time the prevention is easy to be found.

PROPOSITION POR A JUBILES. PROPOSITION FOR A JUBILES.

PYALLUT, W. T., Feb. 4.

TO THE HOFTOR OF THE OBESIONIAN:
More than thirty years ago, we of Paget Sound were jubilant over the prospect of a milroad aeross the continent, and over the Cascade mountains. More than half of our people then living here have gone to their loop rest, with their sanguine hopes extinguished during the lapse of time. O, long and weary waiting! Buring all these Fests we have still been hopping, still been waiting for that grand event when the people of Mastern Washington in direct communication over this hithertonings in the continuous linguishment in the communication over this hithertoninest impassable burrier.

I have often smiled at the complaisance with which we, in last early day, fravely caurassed the probabilities of the route to be adopted, the burn to be built, the circumstances of the probabilities of the route of the probabilities of the probabilities of the route of the probabilities of the

suggestions through the columns of The Orresponders, and, he order to open the way for an organizationer. I will ask that the newspapers of our territory give this proposition publicity, and that those willing to co-operate, or who may have suggestions to make correspond with either of the grotteman named, to the end that we may formulate a plan and adopt a system that will end in a success commensurate with the occasion.

Six inches of snow fell in San Francisco yester-

The bark Astracan, from the Columbia river to the United Ringdon, was wrecked on Melbourne reland bee. 17. The vessel was a total loss; crow all sixed. all suved.

The great strike among laborers along the docks at New York continues, and the blockade of freight of all kinds us said to be worse than ever. A legistive committee is investigating the simulting. On Saturday the president velood a number of raivate petalent in bills, one of them relating to a man

invale pension bills, one of them relating to a manallo had "spent most of the neriod of his enterment in desertion or imprisament for desertion,"
and monther relating to a man who was not size,
the "worthers, goed and large."

The two rections of the democracy in the house
of representatives led by Garbels and Randal respectively, are so fer ing to either about tariff and
sax reduction. The first reason is out down tariff
inters and the latter the internal revenue taxes,
there is sheden proposed of againment.

Luring the year 1-st the muniter of patents ised from the gatent older, at Washington, was
3.913. Number of patents applied for, 41,407. The
stent clier ouring the year paid his government
a profit of \$102,600. For re is now in the treasure
to the credit of the patent final the sant of \$3,
17.403.

A direafult dienster occurred on the Newcont

A direaful dieaster escurred on the Vermont Central railroad on Saturday normal, at 2 o'clook, near Woodstock. A broken ratt threw a transition of the track and down a bank fity feet, crusting everything. The issual fire changed, and these who had not been killed outright were burned to death. About sixty persons perished.

THE GRASS WIDOW HEARD FROM —The Se-

BIDS FOR SURVEYING A RESERVATION.—Surveyor General D W. Taylor, in accordance with nest unions from the commissions of the gol-eral land office, has posted a notice to his office calling for bids for surveying the Umatilin Indian reservation. The reserva-tion contains some 20,000 acres, and is to be sur-vered into townships and sections, the sense as public lands, with the exception of abant 00,000 acres, which is to be divided into 40,80 and 140 acres, which is to be divided into 40,80 and 140

ALONG THE CASCADE DIVISION -Notwith aggine house, tern table and Y are being built at Huson's camp at the eastern hass of the mountair, one mile above McGinnis ranch The station at that punt is called Eastern, and the one at the western base is Western. No coal will be shipped from the Che-slum for suite on the market until all the company's sheet, along the mare full Krom 150 to 160, tons a day is the present output of the minus. The other day a passenger coach took fire from the stove and burnt out the inside roof, sat atood at Cis-clum, while the train went forward to Reslyn to clear the store of snow, which is nine feet deep at

PEREMBED IN ALASKA.—Collector Bond of Port Tongas, Ataska, says the Argus, arrived at Port Tongas, Ataska, says the Argus, arrived at Port Townsend on the Itabo, on his way to San Francisco, and brought word of the sad end of Prof S A. Saxman and two Indians revently Prof Saxman and wile vere smong the teachers taken north on the Loo in Navember leak and were located at Port Tongas by Dr. Jarkson to remain for the winter Prof. Saxman and those who persibled with him started ine cance for Port Cheeter December 13. A cold snap setting in, no rescuing party could venture out till in January, and when they did they found only the cance and some bedding. It probably upwet and the occapanis were drowned. Mrs. Saxman is in Port Townsend, having arrived on the Idaho, and is heartbroken over the fate of her husband She is on her way east to join her relatives in Penneylvania. Prof. Saxman was a Mason, an Odd Fellow, Seiset Knight, and a men ber of the A. O. U. W. He was 32 years old and a cultured gentleman.

MICH ADO ABOUT NOTHING — There was a hubbub at the corner of Booms and Alder streets rectorday. A young man lattering under

no harm had been done ordered the 5 ung-iron full of gin to go home, and the crowd dis-persed in disgust.

Coasina Inchess — the number of peo the who have received more or less set are in the ries while court by during the past few days is nes while couching during the past few day its under greater films by generally supposed. Whole bob-sied loads have limped away hound and lathed their bruises with ar aca and middle hot sign, while the number who have been hurt, but still able to hebble around an keep up as pears read, is innume. The small buy who me unted his sled and gaily sam.

The comparatively large number of wreaks at or near the entitude to Puget's bound during the past acason, must by this time at least bave convinced even the admirers of that great fulual set that however secure a vessel may be, once unside, there are many dangers begotting the mariners who seek that hartor Captain Hawitt, of the steamer our Pedro, just arrived at Tacouna, tells a reporter of the Tacouna Was that "Postruction island, some thirty miles south of Captain leave," and strongly urges the erection of a lighthouse there, by which some of the perits to navigation may be removed. The government has talked, in the past, of taking such a step and it should be done at once. Surely the destruction to commerce is already sufficient to constitute a proper warning. LIGHTHOUSE NEIDED AT CAPE PLATFERY -THE WHECKEH ARTHADAN—Word has been received of the loss of the British bark Astracan, Capt. Johnson, on Melbourne island, December 17. The Astracan was an iron bark of 1942 tone repriet She sailed hence November 19 last with 32 649 centals wheat, valued at \$31 178, cleared 19 Sitson, Quackenbush & o for orders. In November, 1881, she carried bence a cargo of flour. At the time of loss she wis thirty two days out. Melbourne island, with redford and Minto islands, form a group of the Dangerous archipelago in lat. 21.8, jon. 140 W. This centes are nearly identical with the Low archipelago, which numbers from orgity to ninely islands, altituted test of the Society and French profection. THE WHECKEL ASTRACAN -- Word has been

SALEM. Feb 5 The senate was not in session to-day having adjourned over till 2 o'clock on Monday and the house held only a two hours perfunctory session in the morning. The most interesting occurrence of the morning was a motion by Thompson, of Lane, to recon sider the vote by which the Portland water bill passed last pight. A motion to harter the restriction.

was a motion by Thompson, of Lane, to reconsider the vote by which the Fortland water bill passed last night. A motion to lay the matter over till Monday prevailed. Mr Thompson s action was based upon his epposition to bonded indebt-concess not taxed, and he informs me that his purpose in voting for the bill last night was to be in fix to more consideration this morning. Of course nobody knows what is in the future but I do not believe that the motion to reconsider will prevail. It is believed that the governor will veto this bill, and some doubt is felt as to whether or not it will pass over his veto. Summers has prepared and will offer as a compromise, an aftendment giving the management of the water department into the hands of an elective commission of three persons who shall give bonds in the sum of \$10,000 each, and receive an annual salary of \$500 each. I don't believe that this amendment will help the bill slong in the legislature or with the governor. The opposition in the legislature is on the ground that the monagement of the water department I believe efforts to amend the bill will only result in obstructing it. A LETTER.

Following is a verbatim copy of a letter received resterday by the speaker of the hote. It is only a little more ignorant than dozens which come to

PRANCE AND GEREAST

what Prince Bismarck binnell contessed to be rather trying circumstaness

MUST PLI WITH HER OWN WINGS

BRISSELS Feb 6 - All the Belgian nowspapers indice very barshy of the attitude of the English ress regarding Belgian neutrality and ridicule the idea that Germany or Iranes would ever circumst Belgiain ster invading it even it either did make such a piedue. General op nion here as brought out by the tone of the luglish press is that Belgiain and piedue. General op nion here as brought out by the tone of the luglish press is that Belgiain and no longer expect any power but reefit to protect its Independence and this impression will greatly strengthen the deniand for immediate unitary mensures and the government a resolution to carry such measures out.

BRISSELS Féb 7 - Libero is reason to believe that the Belgian govornment bitherto upposed to compulsory inflitary service will itself practice with the opinion of the fine. The purchase of norses is going on here for the Balgian Lavalry.

[Annon F. 6 - 11 in Proported that I or is shelpen has re- or in the post of the same and the golden and the post of the proper manufactures. There of the largest paper manufactures in a remainly have instructed their aprils for Fig and with proper than fresh contracts for supplies of in the port of Hamburg is tikely to be closed soon in consequence of war.

would call the attention of The Ore ONIAN to every different mining camp that he has been told of here it would, I fear cause that paper to have an extra edition run off but Mr McThee bein, an old timer and a reliable man has caused ma to briefly call your attention to thus place believing as I do that this who is territory leg, limately but it is to or should be tributary to the tade center of the northwest our wan fortiand. Many series before any transcontinental rull answers built be even thought of this whole rithwest country was supplied from tortiand 41 O curany pia or mining camps of bastern O e or and away into Id the dependent an irely of Portland for everything and the mames of Ore

The Crisis Libery to Occur at any Fine. The Home-Bule Prospects Good apparent. Whether he rees that smashes us up be a surrepean are or division on the budget the rock is not far off and on the content of the content of the content of the rees of the rees

THE PRINCE OF WALKS

THE FORE AND HIMMERCK

NEW YORK Feb 8—Post's Berlin, cablegrain
The main subject of discussion in political circles here is the publication of the much talked of manifests of the publication of the much talked of manifests of the pope in favor of Rismarck's demands upon the reficisting. It appears in the form of a dispatch from Cardinal Jacobini to the pope's nuncle at Munich. It is considered here by members of the liberal and center parties as not likely to benefit the government much, because it coursystem to the government much, because it coursys only the desire and not the command of the pope and because the question at issue is between Prins sta and the pope, with which the German empire as such has nothing whatever to do. It is even a pidently expected by the opposition that this direct interference by the pope in domestic politics will react strongly against the government.

A GOVERNMENT CAMDIDATE.

BERLIN Feb 6—AI a large meeting of electors held to day at Berlin Judge Harrs Catholic who lavors the reptennate was chosen as a candidate for the relichatage.

and bustling works for many years. Besides this great advantage and bustling works for many years. Besides this great advantage of the property of the property and used for power either for extraction or reduction right on the ledge at most the entire stock of these two claims are owned by parties on Wood river and this only mas on the property is fide it because of no reads on the property and the ledge at the case of no reads of the property is fide it because of no reads on the property is fide it because of no reads one to Warrens for STOO or \$500 and from Warrens to Alton district for \$.600 and from Warrens for \$.600 and from War

comes from Sait Lake some from Chiesgo and some from Pennsylvania but we never see any from Oregon Just think of sash doors and fluish lug lumber here from California, and even on our tables are Chilfornia fruits and butter (. A. D.

THE WATER QUESTION AND PERSONAL MAT

THE WATER QUESTION AND PERSONAL MAT TERS

PORTLAND Feb * 1847

TO THE EDITOR ** THE URECONIAN

Notwithstanding jf* Corbett's denial I am in formed on what I deem reliable authority that \$4 and \$5 dollars per day was paid for canyassers to the Buil Run pecticu. Mr Oliver, who is under a salary of \$100 per month was one of the active canyassers. He now claims however, that he was in the employ of the chief engineer of the water committee teho pays him out of his own eatary. While I never was a candidate before the peope for their suffrage still I promise them now if I should succeed Mr Corbett on the commission to make it decidedly tropical for the chief engineer who would take so much interest in thing increasing the should succeed Mr Corbett on the commission to make it decidedly tropical for the chief engineer who would take so much interest in thing increasing the property of \$100 per month. Homehody has been systematically working this thing up and fooding the bills and while I do not think it is the committee, swill I do think some of their employees and others seeking positions at their hands are parties to it, as Mr Oliver explanation would seem to indicate

I have no apology to offer the public nor the committee for publicly discussing this question for I am interested in it in common with every person who owns a loot of real estate in the city and therefore I ask that the committee revestigate this inalter and if Mr Oliver's state in the city and therefore and if Mr Oliver's state in the city and therefore and if Mr Oliver's state in the city and therefore and if Mr Oliver's state in the city and therefore their property to the extend to a majority of the property owners of Fortland to encume and the summary dismissal of the dief continuer files and the summary dismissal of the dief continuer in the best and the continuers to keep the water rates up to present liqures then I cheerfully acties a grant on either on these upstions and hence k claim to action should be taken under the city interested public
